Sai Koushik Korada

Agentic AI & Full Stack Engineer

+91 7995824375 | koushikkorada27@gmail.com | LinkedIn | GitHub | LeetCode | Portfolio

PROFESSIONAL SUMMARY

Agentic AI Full Stack Engineer skilled in building LLM-powered applications using LangGraph, LangChain, and FastAPI, alongside full-stack development with the MERN stack. Experienced in developing agentic workflows, tool calling, RAG, memory, microservices, and REST APIs. Strong foundation in Data Structures and Algorithms with 1600+ problems solved across LeetCode and GeeksforGeeks, focused on building scalable, reliable, and maintainable software systems.

EDUCATION

B.Tech in Computer Science & Engineering 2023 – Present
RGUKT, Srikakulam **CGPA: 9.0**

TECHNICAL SKILLS

Languages: C++, Python, JavaScript
AI: LangGraph, LangChain, LLM Integration, Tool Calling, Basic RAG
Backend: FastAPI, Express.js, REST APIs, JWT, Apache Kafka, Microservices
Frontend: React.js, Redux
Database: MongoDB, MySQL, Redis, PostgreSQL
Tools: Git, Postman, Docker, Swagger, Vercel, Render
AI-assisted coding tools: GitHub Copilot, OpenCode, Antigravity

PROJECTS

MediConnect — AI Healthcare Platform
React.js · FastAPI · LangGraph · MCP · PostgreSQL · Docker

- Architected a multi-tenant healthcare SaaS platform with **25+ database entities** and **4 user roles**, implementing JWT authentication, role-based access control, and server-side tenant isolation.
- Developed an Agentic AI system using **LangGraph with 12+ nodes** and an **MCP registry with 20+ capabilities** for conversational hospital discovery, doctor selection, appointment booking, and conditional tool execution.
- Developed REST APIs and React interfaces for hospital onboarding, doctor management, appointment scheduling, patient questionnaires, and administrative workflows using **FastAPI, PostgreSQL, and React.js**.
- Improved system scalability and reliability through modular backend design, efficient API handling, and **Docker-based containerization**, enabling consistent deployment and maintainable multi-hospital operations.

GitHub · Demo

ChatAI — AI-Powered Conversational Platform
LangGraph · FastAPI · React.js · PostgreSQL · RAG

- Built a full-stack AI chat platform supporting **multi-turn conversations**, short-term and long-term memory, document Q&A, summarization, and tool calling.
- Designed a **LangGraph-based workflow** with 4 core components: chat, summarization, memory, and tool execution, using conditional routing for dynamic task handling.
- Developed a **RAG pipeline** integrating document processing, text chunking, embeddings, vector retrieval, and semantic search to generate context-grounded responses.
- Built REST APIs using **FastAPI and PostgreSQL** and developed a responsive **React.js** frontend for conversational AI and document interactions.

GitHub · Demo

E-Commerce Microservices Platform
Node.js · Express.js · React.js · Kafka · MongoDB · MySQL · Redis

- Architected a distributed e-commerce platform comprising **8 microservices** covering authentication, products, cart, orders, inventory, payments, notifications, and API gateway.
- Implemented **event-driven communication using Apache Kafka**, enabling asynchronous message exchange and decoupled interactions across 8 microservices.
- Developed backend services using **Node.js and Express.js**, integrating **3 data technologies** (MongoDB, MySQL, Redis) with JWT authentication and Redis caching.
- Implemented **Redis-based distributed locking** for concurrent inventory operations and integrated **Docker-based containerization** to package microservices with their required dependencies.

GitHub

CODING ACHIEVEMENTS

Leetcode · **Gfg**

- Solved **1600+ DSA problems** across LeetCode and GeeksforGeeks, securing **8th Rank at University Level** on GeeksforGeeks and achieving a **Top 9% LeetCode contest rating**.
- Earned the **500 Days Badge** and **SQL 50 Badge** on LeetCode, demonstrating consistent problem-solving practice and SQL proficiency.
